Summary

Hi! I'm Cris a Staff Product Designer with 9+ years of experience designing and scaling end-to-end product experiences across fintech, IoT, SaaS and AI-native products, including a fintech ecosystem serving 6M+ users. Leads product design from discovery and UX research to high-fidelity UI and delivery in complex, regulated environments. Partners with Product, Engineering and Data to define product strategy, improve adoption and drive measurable business outcomes.

Experience

02/2026 – Present
Argentina

Lead Product Designer
EY GDS
Leading end-to-end enterprise product design for complex internal platforms used by 400,000+ professionals globally.

- Own and lead discovery, research, and design across multiple global enterprise initiatives.
- Set direction for AI-enabled experiences, including LLM-powered assistants, generative content & intelligent workflows.
- Strengthen and evolve enterprise design systems (tokens, components, documentation) used by distributed global teams.
- Integrate research insights and analytics into iterative, data-informed product decision-making.

08/2025 – 02/2026
Buenos Aires, Argentina

Lead Product Designer
heysam.ai (*closed*)

- Product & Vision: Partnering with the founder to translate business goals into design vision for HeySam's early stage roadmap.
- Product Design (0→1): Owning the entire design lifecycle, UX flows, UI systems, and prototyping, ensuring speed without sacrificing craft.
- AI-Driven UX: Designing experiences that leverage AI to make Sales Conversations more effective, including intelligent workflows, demo automation, and real-time collaboration.
- UX Growth & Go-to-Market: Creating experiences and assets that drive growth, from acquisition and activation flows to outbound marketing materials and lead generation campaigns, aligning UX with business objectives.

02/2025 – 08/2025
Buenos Aires Province, Argentina

Tech Lead Product Designer
MODO

- Defined UX strategy through OKRs and roadmap planning for 2 core squads, acting as the UX decision owner for QR & NFC payments and shaping a compliant, scalable experience adopted by 30+ partner banks.
- Created a UX QA framework that became the company-wide standard, raising design quality and alignment across multiple squads and tribes in a regulated fintech environment.
- Designed and owned the end-to-end UX model (POC → pilot → V1 → iterations) for MODO's NFC tap-to-pay platform, creating a reusable experience that scaled to 66K+ MAU and was adopted by 30+ partner banks via a plug-and-play SDK serving 6M+ users.

06/2022 – 02/2025
Argentina

Product Designer
MODO

- Owned the 0→1 UX of a loyalty platform, leading the experience from discovery to a pilot launch with Axion, enabling a new business vertical.
- Designed the SUBE bus card top-up experience inside the app, supporting 100K+ MAU in the first 6 months.
- Designed and shipped a digital tipping flow across 30+ partner banks, generating 15K completed tips with a 16% conversion rate in the first 30 days.

11/2020 – 06/2022
Argentina

Product Designer
Drixit Technologies (*Acquired by Rombit*)

- Designed, defined and implemented a mobile-first design system, selectively merging shared elements from the desktop system, enabling faster and more consistent product development across platforms.

• Designed the mobile experience for on-site managers, supporting real-time supervision of workers operating in high-risk industrial environments.
• Designed a monitoring dashboard to provide at-a-glance visibility into hardware status, including battery life, movement, device ID matching, and operational health of IoT wearables deployed on-site.
• Translated complex industrial safety and IoT data into clear, actionable interfaces, helping managers quickly assess situations and make informed decisions in time-critical contexts.
• Contributed to the platform's role in enabling safe operations during the COVID-19 pandemic, supporting 1 industrial plant in completing overdue maintenance stoppages under social distancing constraints without reported safety incidents.

05/2019 – 11/2020
Argentina

UX Designer
Summa Solutions

- Collaborated with multidisciplinary delivery teams (product, engineering, QA) to design and iterate on features aligned with client needs and technical constraints in a software factory environment.
- Contributed to usability and conversion improvements by refining information architecture, interaction patterns, and visual hierarchy across web-based commerce experiences.
- Supported multiple client projects in parallel, adapting quickly to different domains, requirements, and timelines while maintaining design consistency and quality

Education

01/2020 – 01/2023
